1. Overview

Insife HALOPV 6.1.1 is a patch release of bug fixes for HALOPV 6.1. It contains fixes and changes as detailed in section 3, to address some key identified bugs/tweaks. Further Patch 6.1.1 also includes few configuration updates as detailed in section 4, to enable users to access few existing HALOPV functionalities.

None of the issues included in this patch release have required any specification updates.

2. Upgradability

HALOPV 6.1.1 requires the environment to be on the HALOPV 6.1 version.

3. Bug fixes and changes in this patch

The following features have been updated or added in this patch release. Note that the listed Impact is associated with the issue *not* being resolved or implemented:

Area / Process / Group	Title	Description	Impact	Issue ID/ Specification
ICSR	Downloadable report update for Daily Case Triage Report and Active Case Workflow Report	Fixed report header for Daily Case Triage Report and Active Case Workflow Report downloaded files. Header will now display current date and report title.	LOW - This was impacting only downloaded files.	HLP-14242 Not required
ICSR	Blinding logic update in Case Form	Blinded procedure was updated so users without unblinding role should not see blinded data in HaloPV. The blinded data is now masked in all fields where unblinded data is present.	MEDIUM - This fix is to ensure accidental un blinding.	HLP-13672 Not Required
ICSR	Case Processing Workflow updated for mandatory QC Check	Case processing workflow configuration has been updated for "Quality Control" step, now users having "Quality Control" user roles has to mandatory approve a record before marking it as done.	MEDIUM - Users are required to mandatory Complete "Quality Control" Workflow step before completing a record	HLP-13652 Not Required *
ICSR	Blinding logic update in Case - Daily Case Triage Report And Active Case Workflow Report	The blinded logic was updated on the "Daily Case Triage" and "Active Case Workflow" Reports with the following: - Product name should be displayed as "Unblinded Product" for users without the "Unblinding" role - A user who has the "Unblinding" role assigned to their user profile shall be able to see the product name.	MEDIUM - The fix is to prevent accidental unblinding.	HLP-12939 Not required

Area / Process / Group	Title	Description	Impact	Issue ID/ Specification
		The change is applicable for below columns of the above reports: - Suspected Products - Non-Suspect Products - Products (as reported) - Suspect Products (as reported)		
<Module Independent>	User Review and User List View update	The "User Review Report" is now displaying all users who have access to the entity.	LOW - Updated limited to View and Display, does not impact actual user access.	HLP-12877 Not Required
<Module Independent>	Master Search field length	Updated Master Search Field length input limit to 15 characters from 9 characters	LOW - This is a minor schema update, no change in functionality	HLP-12776 Not Required
Aggregate Reporting	Aggregate report - Special characters in product name	Updated Aggregate reports to handle Product names/ Substances having special characters such as - ' (Single quote), - (Hyphen), , (Comma). This update is limited to HaloPV 5.1 and earlier versions. Additionally, updated to ensure that for some values, where more than 1 value exists, only a single value is returned.	LOW - Minor update in Aggregate report filter function to handle special characters.	HLP-12090 Not Required

* System Specification - Insife HALOPV System Specification - INSIFE-HALOPV-SS-39 will get updated for this in HALOPV 6.2
