HaloPV

From fragmented safety operations to connected pharmacovigilance.

HaloPV helps life sciences organisations modernise pharmacovigilance without forcing a one-size-fits-all transformation.

Deploy targeted capabilities alongside your existing safety ecosystem, or use HaloPV as a connected platform across safety operations, science, governance and intelligence.

OPERATE SMARTER

Automate high-volume safety work while keeping people on the decisions that require expertise.

SEE SAFETY MORE CLEARLY

Connect safety data, signals, risks and operational insight for better-informed decisions.

GOVERN WITH CONFIDENCE

Strengthen oversight, traceability and readiness as regulatory expectations evolve.

CONNECT WHAT MATTERS

Bring processes, data and systems together so PV modernises without another silo.

MODULAR MODERNISATION

Modernise without starting again.

- Adopt the capabilities you need today.
- Connect with your existing safety technology.
- Expand when your organisation is ready.

DATA, INTEGRATION
& INTELLIGENCE

A platform for the next generation of drug safety

PV organisations are being asked to do more with growing data volumes, regulatory complexity and emerging AI capabilities. HaloPV is a connected foundation for modern safety operations — adopted where it is needed most.

1. INTELLIGENT SAFETY OPERATIONS

Capture, process and manage safety information globally — automation and intelligent assistance under human oversight.

2. SAFETY SCIENCE & OVERSIGHT

From processing safety data to understanding it: risk, aggregate reporting and analytics.

3. GOVERNANCE & READINESS

Governance inside the operating model: PSMF, agreements and regulatory intelligence.

4. MODULAR BY DESIGN

Run HaloPV end to end, or as targeted capabilities beside your existing safety database — joined by APIs.

COEXISTENCE

No rip-and-replace required.

Modernise specific areas of pharmacovigilance while preserving the systems and investments that work.

EXPAND OVER TIME

MODULAR BY DESIGN

Start with the capabilities that solve your priorities today.

CONNECT TO WHAT YOU HAVE

Integrate with existing safety and enterprise technology, not another isolated system.

EXPAND AT YOUR PACE

Add capabilities over time, from targeted modernisation to a broader platform.

Practical AI. Governed by design.

The future of pharmacovigilance is not simply more automation. It is applying AI where it can genuinely augment safety teams — alongside connected data, governance and human oversight.

HaloPV brings AI-enabled capabilities into the wider safety process, where their impact can be understood, controlled and scaled.
